

EQUINEW FES 310

Clinical Cases

Clinical cases are examples of injuries that have been successfully treated with FES. Specific cases were selected because they were treated exclusively with the FES modality and have documentation of the treatment progress. These examples are offered only as an overview of a specific case, which may or may not apply to another similar case. Each clinical case will provide specific issues unique to that particular horse.

“Divey”

6-yr old mare – Warmblood

Traumatic Fetlock Edema

4 FES Treatments to lower leg

SUMMARY: Upon examination the fetlock was swollen and warm and the site was tender to the touch. This was an acute injury that had occurred within 24 hours of treatment.

Pre-treatment

2 FES treatments
