

FES 310 Electrical Muscle Stimulator

Extensive testing and research has been utilized to develop an electrical muscle stimulator specifically for use on horses

Features For Durability

- Rugged aluminum case
- Display panel protection handles
- Rechargeable battery with capacity for continual 12 hour use
- Replaceable long-life battery
- Quick disconnect cable to improve safety and prevent accidental rip out
- Protective case with attachment straps

Features For Performance

- Product is specifically designed for horses
- Six electrodes for superior coverage
- Software upgradeable
- Superior surge protection
- 16-bit microcontroller for optimum accuracy
- **2-Year 100% Full Warranty on Hardware and Software**
- **90-Day 100% Money Back Guarantee**

Features For Ease of Use

- Panel display shows time of therapy to seconds
- Panel display shows actual voltage applied, not just knob value
- Separate custom pads for back and legs
- Extra pad liners for sanitation between horses
- Pads hold electrodes securely with Velcro
- Velcro allows customized positioning of electrodes
- Comfortable surcingle to attach system to the horse so wires are safely secured
- Attractive traveling bag
